Dear President of the Board of European Girls Mathematical Olympiad
Dear members of the Board
Dear members of the Jury

The Union of mathematicians of Macedonia - Armaganka introduced us with their idea and intention to be hosts of one of the future editions of EGMO in Republic of North Macedonia. Since we as an institution support all efforts to promote mathematics and science in general, and invest in young people and their knowledge, it would be our pleasure to support this wonderful event in our country. Our intention to do this can be seen from the fact that we know the team that would organize the event. All of them are highly professional and they have a serious approach from the very beginning. All this can be backed up from our previous experience working with them on events like this one. We can say that according to what we know up until now, we expect to have a successful EGMO in our county.

Skopje, 23.9.2019

Vice president of the Board

M-r Sefer Canoski
